

SecureWebManager

One username. One password.
Unlimited access.

ICM/DBMS Health Services is proud to announce the inclusion of SecureWebManager, to our array of online benefit solutions.

SecureWebManager is a web based, SSO (Single Sign-On), password management service that provides convenient and safe access to any websites that require login credentials for access. You can now login to one website and we manage all the usernames and passwords for you. Our internet access solution is ideal for employee benefit communications and many other work related websites and enhances both convenience and security.

SecureWebManager can link you to any of the following Employee Benefit websites and more:

- HSA Accounts
- FSA Accounts
- HRA Accounts
- Claim Lookup
- Online Enrollment
- Personal Health Records
- Health Risk Assessments
- Benefit Forms & Documents
- Medical Networks
- Dental Networks
- Vision Networks
- Retirement Accounts
- Pharmacy Accounts
- Human Resource Accounts
- Any Other Website

SecureWebManager does the following for you:

- Remembers all your usernames and passwords
- Logs you into all your protected websites
- Increases security and protects your identity

SecureWebManager protects against:

- Hacking
- Phishing
- Keylogging
